

PHARMACEUTICAL CUSTOMER COMPLAINT REPORT

Quality Management System (QMS) • Regulated under FDA 21 CFR Part 211.198

Parameter	Reported Details
Complaint Source	Regional Hospital Network / Inpatient Pharmacy
Customer Name	St. Jude Regional Hospital (Dr. Sarah Jenkins)
Product Name	Amoxicillin Trihydrate Capsules 500mg (FDF)
Dosage Form / Strength	500mg Oral Capsule (USP Grade)
Batch / Lot Number	AMX-2024-089A
Manufacturing Date	2024-03-15
Expiration Date	2026-03-14
Quantity Affected	2,500 units (50 retail cartons)
Originating Site Block	Sterile FDF Formulation Block C
Impacted Packaging Material	PVC/PVDC Blister Foil Backing
Defect Summary	Yellow-brown capsule discoloration and mottled speckling with heat-seal seam pinhole perforation.
Initial Defect Severity	Major (Class II GMP Defect)
Priority SLA	High (72h Investigation Mandate)

Detailed Description & Clinical Observations:

During routine hospital pharmacy dispensing stock intake for inpatient wards, pharmacists noticed abnormal yellow-brown discoloration and mottled dark spots on capsule shells. Upon closer physical examination under magnification, micro-pinholes along the blister pocket heat-seal seams were identified, causing atmospheric moisture ingress into the primary packaging cavities. Affected boxes have been quarantined in the hospital pharmacy vault pending QA return authorization.
